

I have a Twitter account. I log into this account on my PC desktop which runs Windows 10. I do not know how to post a video or a picture or a link or anything. Please explain to me as you would do a 10 year old child and extremely simple terms how I can proceed to do this

PERPLEXITY

To post a video or a picture on Twitter from your PC desktop which runs Windows 10, you can follow these simple steps:

Open your web browser and go to the Twitter website.

Log in to your Twitter account.

Click on the "Tweet" button on the top right corner of the screen.

Click on the "Photo" icon to upload a photo or the "GIF" button to upload a GIF.

Select the file you want to upload from your computer.

Add a caption or text to your tweet.

Click on the "Tweet" button to post your tweet.

To post a video on Twitter, you can follow these steps:

Open your web browser and go to the Twitter website.

Log in to your Twitter account.

Click on the "Tweet" button on the top right corner of the screen.

Click on the "Photo" icon to upload a video.

Select the video file you want to upload from your computer.

Add a caption or text to your tweet.

Click on the "Tweet" button to post your tweet.

Alternatively, you can also record a video directly on Twitter by following these steps:

Click on the camera icon on the top right corner of the screen.

Click on the "Video" icon to record a video.

Hold down the capture button to record your video.

Add a caption or text to your tweet.

Click on the "Tweet" button to post your tweet.

You can also embed a video from YouTube on Twitter by following these steps:

Navigate to the YouTube video that you want to embed in your tweet.

Click the "Share" button.

Tap the "Copy" button to copy the YouTube video link.

Go to Twitter and create a new tweet.

Paste the YouTube video link into the tweet.

Add a caption or text to your tweet.

Click on the "Tweet" button to post your tweet.

Note that Twitter now allows you to post up to four images, videos, and GIFs all in one tweet
